Mission & Vision

- **MISSION:** Responsible for providing the information architecture and applications for shaping the battlespace against the Chemical, Biological, Radiological and Nuclear (CBRN) threat.
- **VISION:** Provide the Warfighter with the most effective integrated early warning capability; a cutting-edge DoD accredited CBRN hazard prediction model; and state-of-the-art biosurveillance situational awareness, collaboration, and analysis tools resulting in optimized decision support capability for Commanders across all operational levels from tactical to strategic as well as bridging the interoperability gap from DoD to Interagency.

JPM Information Systems Products

- **JPM IS - Building the enterprise solution to provide the common warning and reporting, hazard prediction and decision support backbone for the collection, analysis and dissemination of Chemical, Biological, Radiological and Nuclear information**
- **The Joint Warning and Reporting Network (JWARN), the Joint Effects Model (JEM), the Biosurveillance Portal (BSP) and utilization of consequence management and decision support systems will provide the data and services optimizing decision support capability for commanders across all operational levels from the tactical to strategic as well as bridging the interoperability gap from DOD to civil agencies**
- **These services include:**
 - Integrated warning and reporting
 - Managed sensor networks
 - Hazard modeling and prediction, depiction and avoidance
 - Biological and Medical Surveillance
 - Incident management, decision support and consequence management

End-to-End CBRN Capabilities

Providing CBRN data and services to stakeholders across all levels of command, optimizing decision support, and shared situational awareness across DoD and HD.

Sensors and Systems

Warning, Reporting, and Dissemination of CBRN Information

Hazard Analysis and Predictions

Decision Support/Incident Management

Common Enterprise Standards, Protocols, Information Assurance, Architecture

Enterprise solutions supporting collection, analysis, and dissemination of actionable CBRN information

JEM Increment 2 Modernization

The screenshot displays the JEM 2.0 software interface. On the left, the 'JEM Scenario Creator: RDWD' window is open, showing configuration options for a dispersal device. The 'General' tab is selected, and the 'Dispersal options' section is visible. The 'Dispersal device' is set to 'Predefined (large)'. The 'Material type' is 'Americium-241', the 'Material form' is 'Ceramic Powder Pellets', and the 'Source term modifications' are set to 'None'. The 'Material amount' is '100 kg'. The 'HE mass' is '1000 kg'. The 'Security information' section is also visible. The 'Advanced options' section is collapsed. The right window shows a map view with a color-coded dispersal plume. The map is overlaid with a grid and shows various geographical features. The timeline at the bottom indicates the simulation time, with a play button and a 'Loop' button.

Inputs

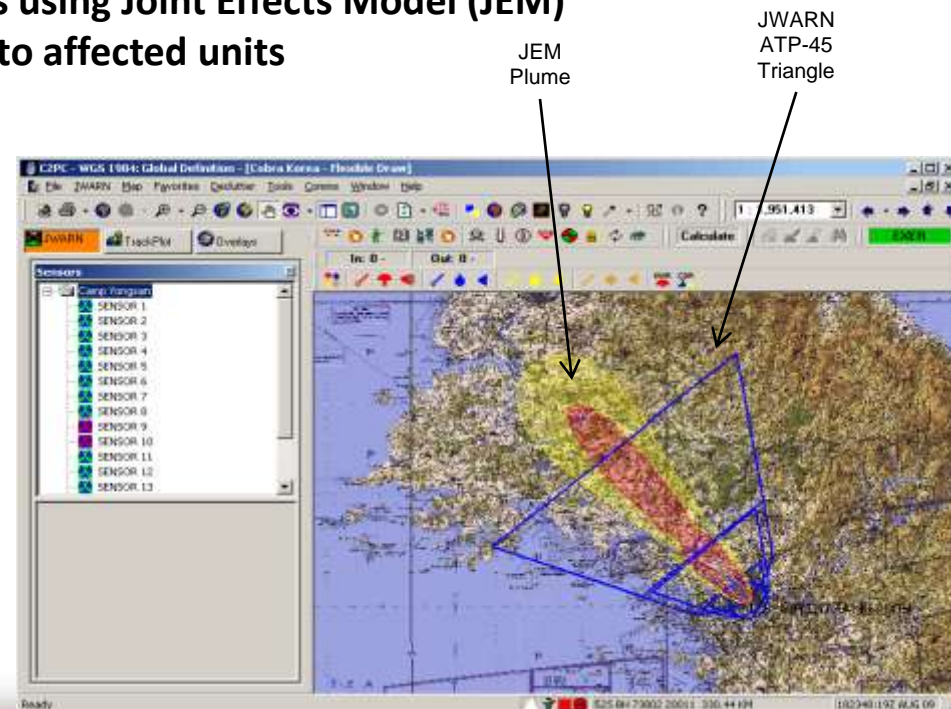

Outputs

Joint Warning and Reporting Network (JWARN)

Provides Joint Force Commander (JFC) with the capability to:

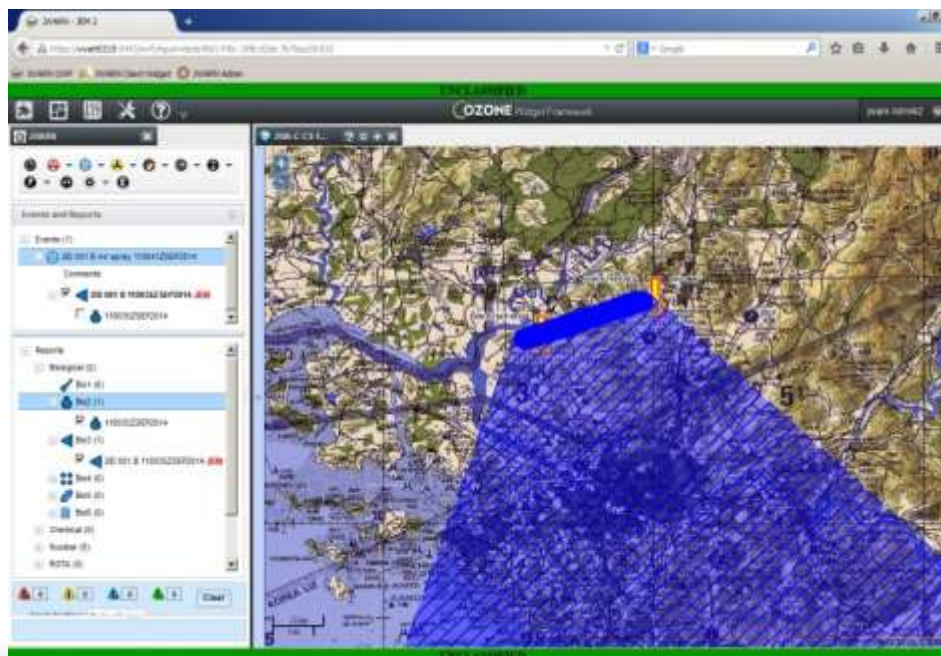

- Report CBRN and Toxic Industrial Materials (TIMs) hazard detection
 - Collect, generate, edit, and disseminate NBC plots on C2 platforms to provide a Common Operational Picture (COP) for the Warfighter
 - Collect, generate, edit, and disseminate NBC reports (NBC-1/NBC-4)
- Analyze detections to enable identification of the hazard and plot affected locations
 - Auto generation of ATP-45 hazard warning area
 - Generation of more detailed hazard area plots using Joint Effects Model (JEM)
- Disseminate warning and de-warning information to affected units
- Auto retrieval and archiving of event data to enable post operations forensic evaluation
- Control and configure a local sensor network (LSN)
 - Interfaces with sensor detectors:
 - M22 (ACADA)
 - ADM-300A
 - AN/VDR-2
 - M8A1
 - JCAD
 - M21 (RSCAAL)
 - JSLSCAD

JWARN Increment 1 Modernization

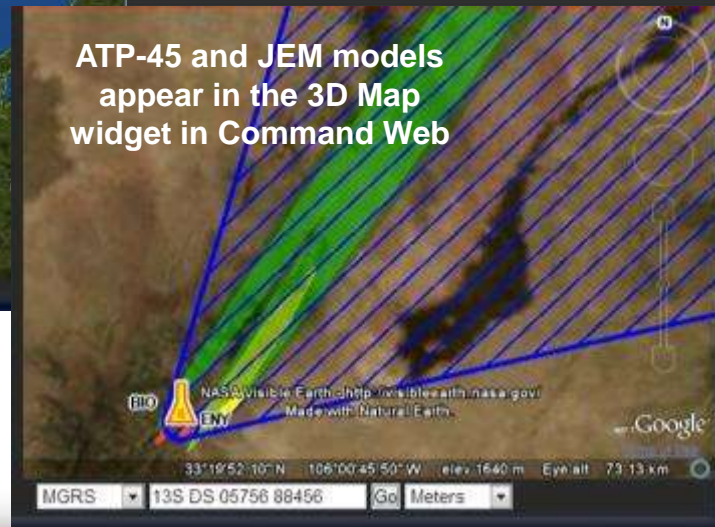

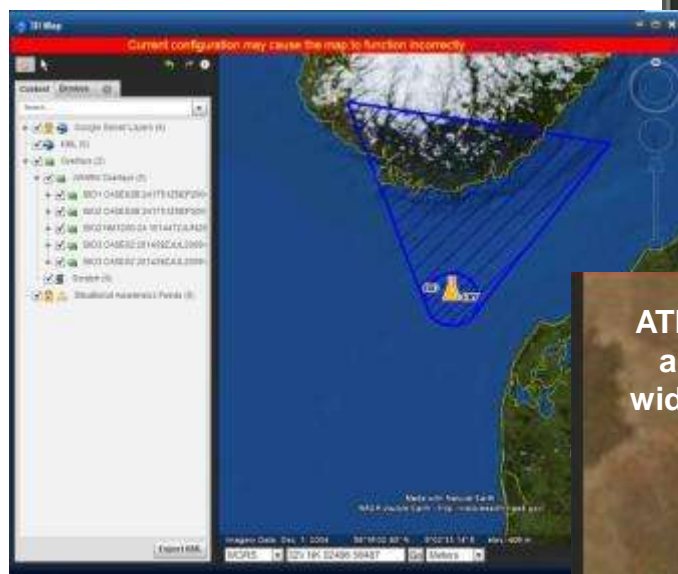

- Migrate JWARN capabilities into a Web Application meeting the Army's architecture implementation
- Update of ATP-45 standards
- Incorporation of Common CBRN Sensor Interface (CCSI) standards ("plug and play" capability)

JWARN Web Application

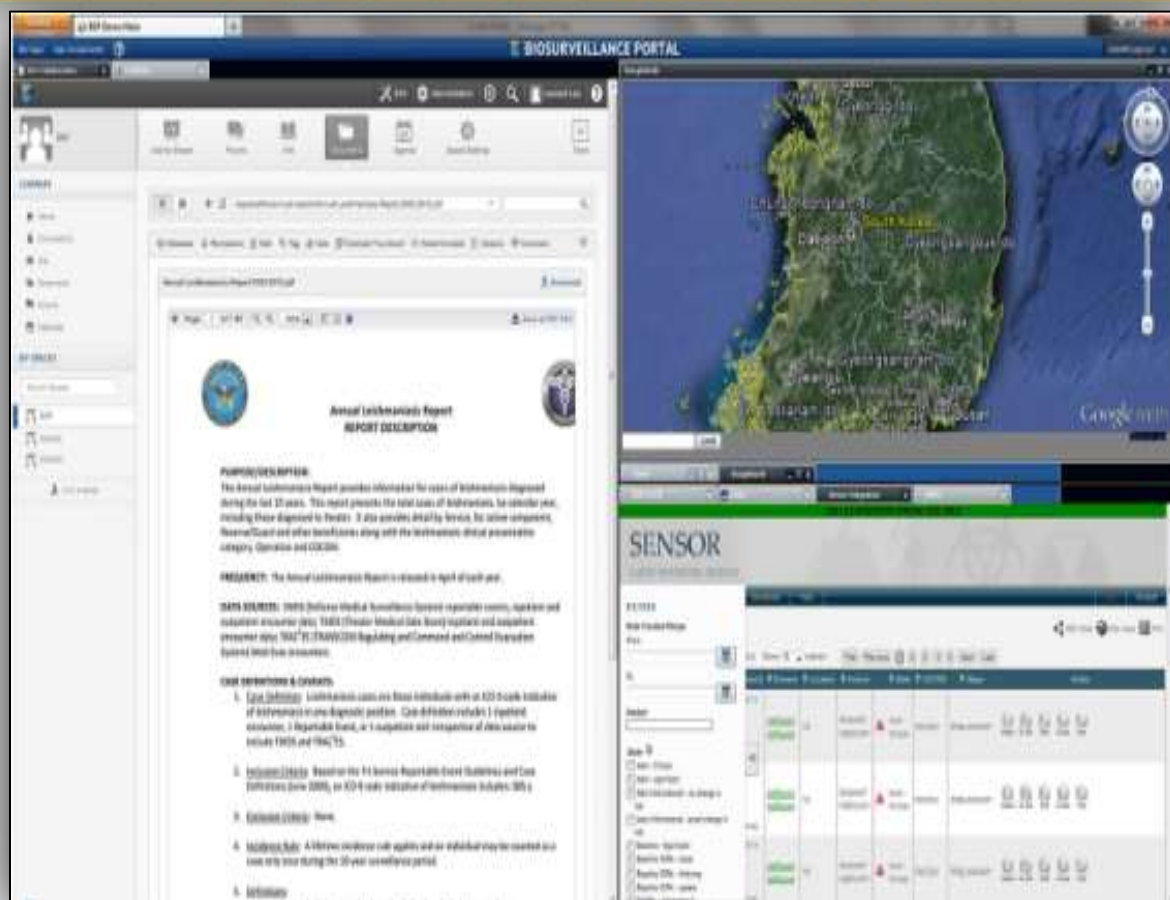

- Intended to replace JWARN 1F upon Army removal of the Maneuver Control System
- JWARN Web App recently underwent FOTE at the Army's NIE 14.1
- JWARN Web App required to conduct FOT&E-4 test (UFG 14) to support fielding in US Army CS 11-12 architecture

Biosurveillance Portal (BSP)

- Single integrated and collaborative biosurveillance environment
- All-hazards capable
- Unclassified/NIPR
- Globally deployed
- Multi-functional user base
 - CCMDs (Surgeon, J5, J3, J2)
 - Super users
 - Periodic users
- Supports Interagency and International partners
- Web-based, cloud-hosted Ozone Widget Framework (OWF) platform

A single well-integrated effective National Biosurveillance Enterprise

Biosurveillance Portal Capabilities

Data Visualization

- Disease Activity
- Sensors
- Demographics
- Facilities

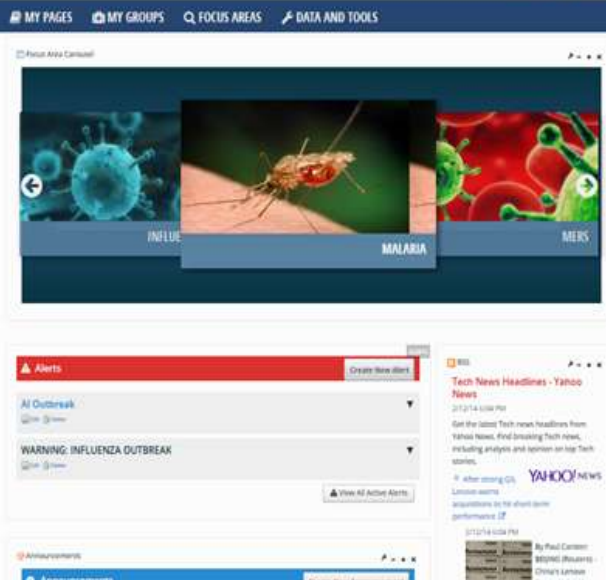

Analysis Tools

- Epidemiological Analysis
- Medical/Electronic Health Record
- Social Media Analysis
- Health Risk Management

Library

- CBRN/Public Health Reporting
- Disease Risk Assessments
- CBRN Knowledge Databases
- BSV Resources Directory

Biosurveillance Portal

Collaboration

- Chat
- Directories
- Mass Notification
- Alerts

Focus Areas

- Emerging Disease Events
- Recurring Disease Events
- Crisis Events

Modeling & Simulation

- CBRN Plume Modeling
- Predictive Models
- Event/Disease Forecasts
- Impact Projection Models

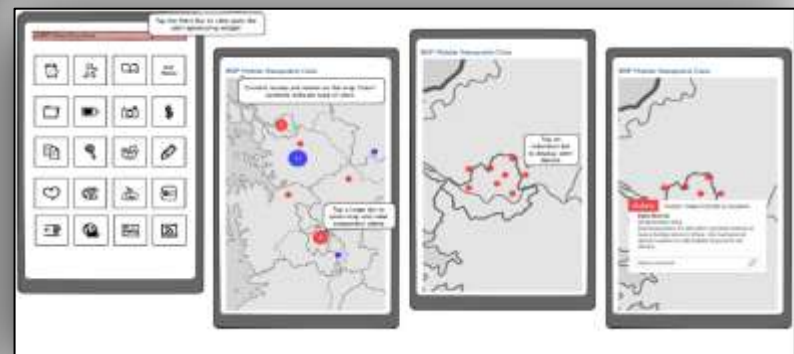

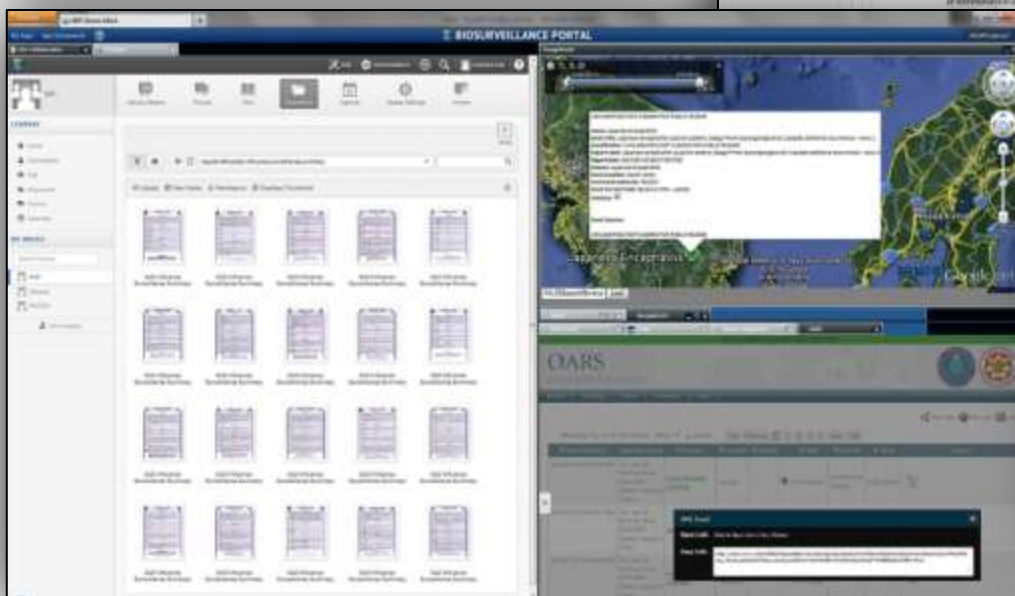

Authenticated Data Sources

Advanced Analytics

An Integrated Biosurveillance Environment

Portal User Concept & Interface

What is next for Information Systems?

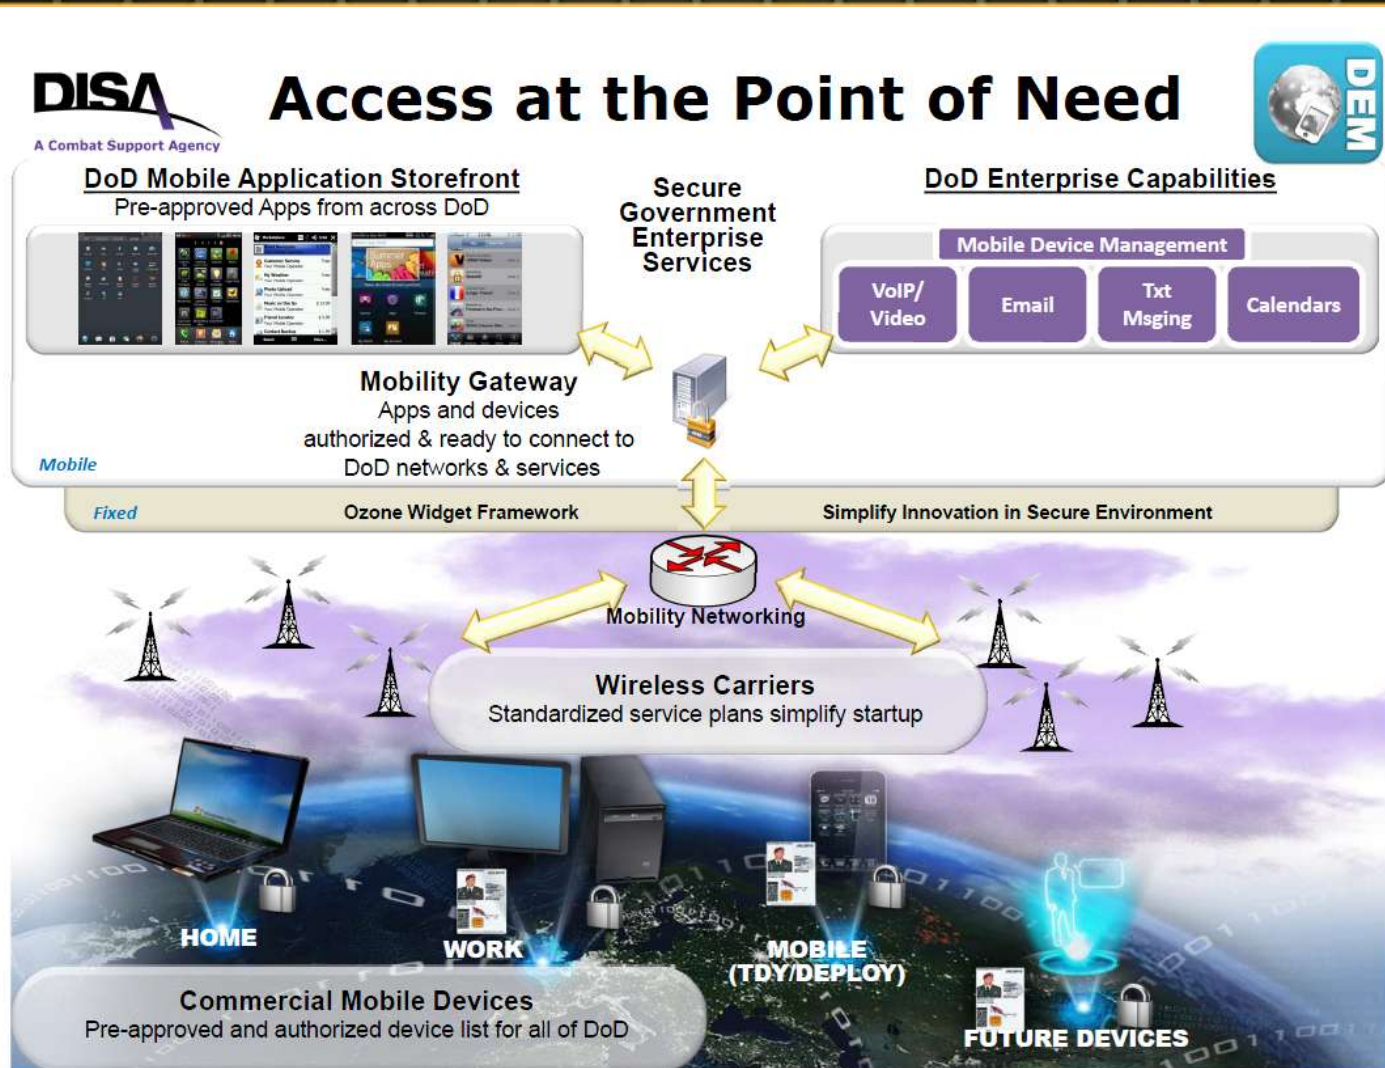

Joint Information Environment (JIE)

A secure joint information environment, comprised of shared information technology (IT) infrastructure, enterprise services, and a single security architecture to achieve full spectrum superiority, improve mission effectiveness, increase security and realize IT efficiencies. JIE is operated and managed per Unified Command Plan (UCP) using enforceable standards, specifications, and common tactics, techniques, and procedures (TTPs).

The implementation of JIE requires unprecedented, dedicated support and cooperation to achieve this major Department objective. (DoD CIO memo dtd 26 Sept 2013)

Joint Information Environment (JIE)

Capability Sets and Acquisition Strategies should be shaped to leverage the JIE/JOC

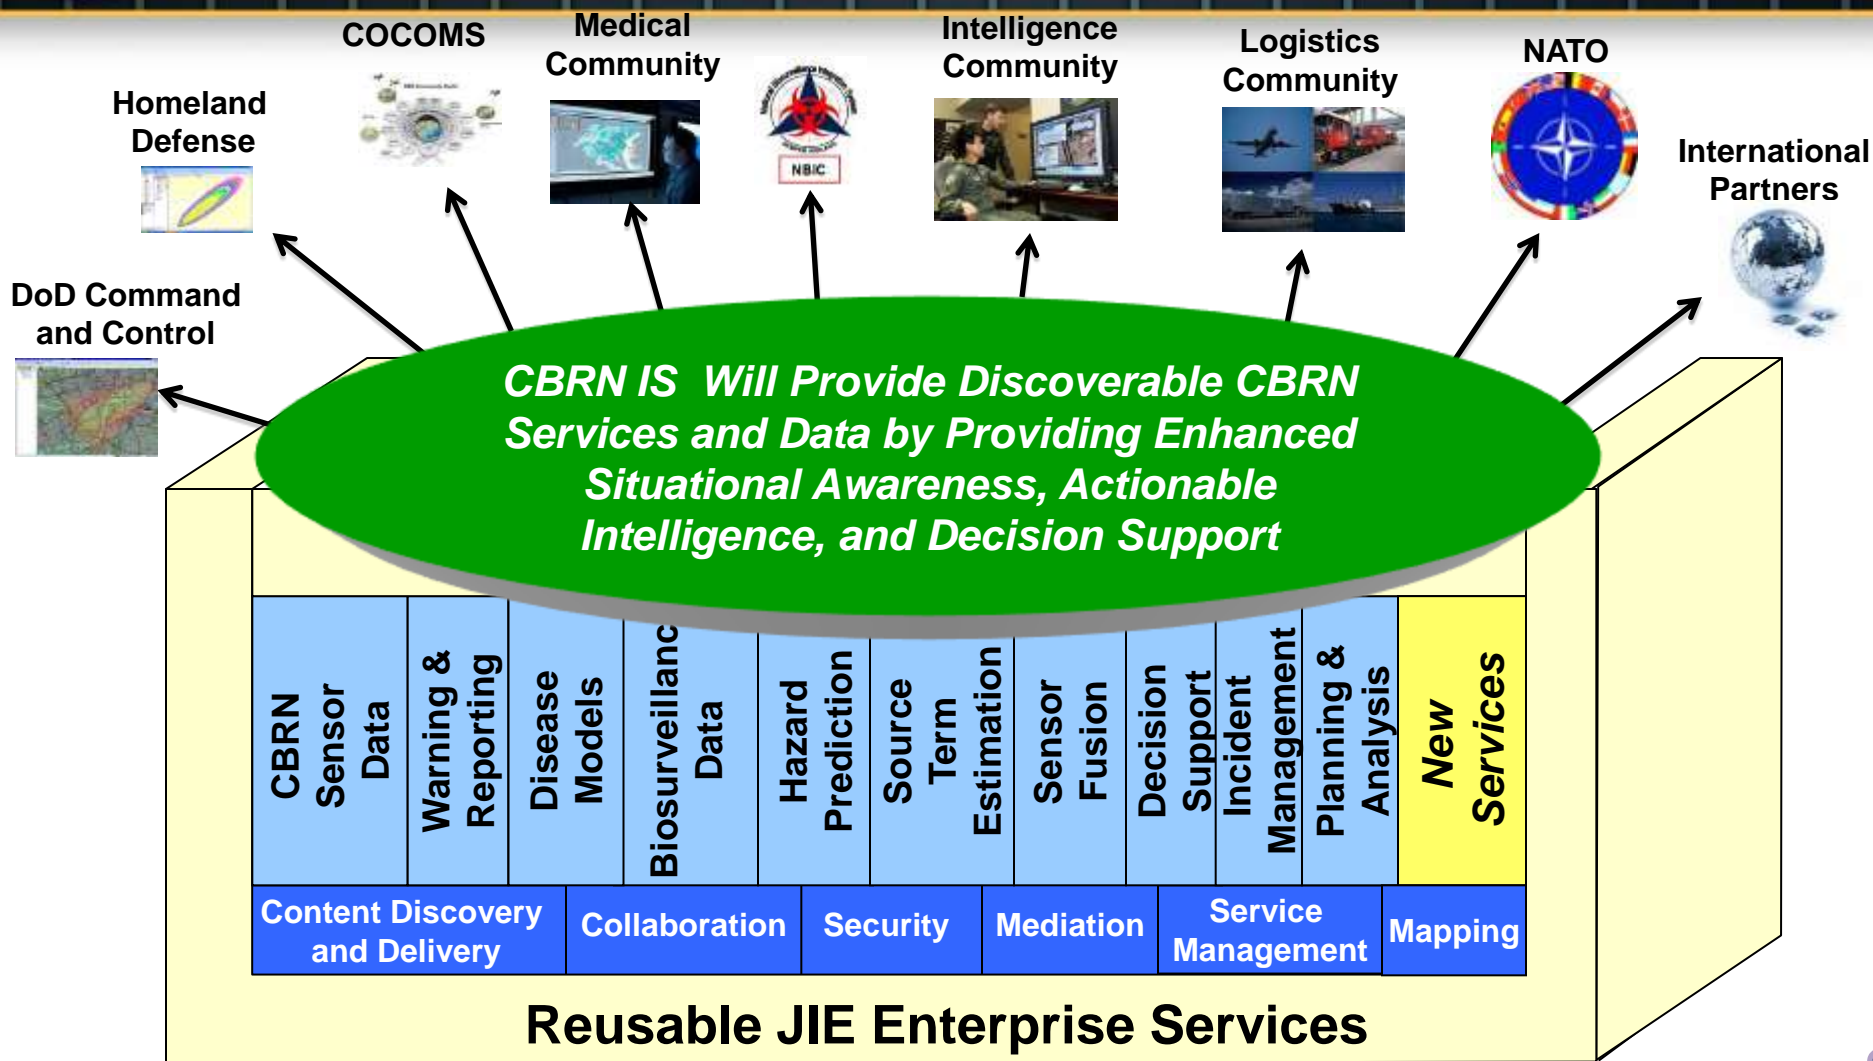

CBDP CBRN Information Systems

- **Objective:** Provide an “End-to-End”, easily accessible set of CBRN Enterprise capabilities through web services utilizing Service Oriented Architecture (SOA)
- **This strategy will leverage:**
 - CBRN Hazard Awareness and Understanding
 - Joint Information Environment
- **Benefits:**
 - Reduce total cost of ownership
 - Reduced cost of test
 - CBDP customers can access information resources from any authorized IT device from anywhere in the world

Providing CBRN Capabilities via the JIE

Provide effective, reliable, robust capabilities that enable authorized users to connect with any device, anytime, from anywhere on the globe

Implementation Strategy

- **Promote S&T standards that allow for quicker technology updates and insertion into product lines**
- **CBRN Information Systems (CBRN IS) Enterprise will initially integrate appropriate JPEO-CBD products into a FoS framework (to begin with JWARN, JEM and BSP)**
 - Align validated requirements into an enterprise approach
 - Utilize proven sustainable capabilities as building blocks
 - Align and expand to support the enterprise
- **Utilize Agile Development within the IT Box Acquisition Strategy to provide for the spiral development and fielding of modular capability packages**
 - Allows for better alignment and quicker delivery of S&T products into the program
 - Allows for accelerated development, and for fielding mature and high-priority capabilities
 - Allows greater flexibility for changing IT architecture and technology

Create an expandable and adaptable enduring capability that will continuously leverage emerging technologies

Current Contracts

- **JEM**
 - Northrop Grumman Mission Systems
 - General Dynamics IT
- **JWARN**
 - Northrop Grumman Missions Systems
- **BSP**
 - Johns Hopkins University-Applied Physics Lab via NAVSEA
 - N00024-13-D-6400
 - PoP: TO SB 206 – ECD 31 May 2016

Contracting Opportunities

- **Q3FY16 – Biosurveillance Portal**
 - Post IOC development
- **Q2FY18 – Joint Effects Model**
 - JEM Inc 2 Maintenance
- **Q1FY19 – Joint Warning and Reporting Network**
 - JWARN Inc 2 Maintenance

Industry Challenges

- **Loss of contractor subject matter expertise during periods of limited funding**
- **Aging industrial base with modeling and simulation expertise**
- **Increased focus on Cybersecurity**
- **Cloud Hosting – move to Consolidated Data Centers**
- **Widget development and standards**

Program Points of Contact
